

You build it, you own it

Training: DevOps Foundation®

Agile is not enough. Learn how you can develop towards a high performing organization through automation, continuous delivery, breaking down the "wall of confusion" between business, development and operations. After the training you can do the DevOps Foundation Certificate exam. Push left like a boss!

Faster and better. These are the goals of DevOps. Companies like Netflix, Etsy, Spotify and Google have influenced DevOps from the beginning. DevOps ist "the way we do things", their culture. How can we adapt the success of these "Unicorns" to traditional companies? In this 2 day training you will learn the principles behind DevOps and their adaption through practices like continuous delivery, value stream, shift left, automation and many more
