Become a Scrum Master

Training: Professional Scrum Master

Learn the most popular agile method and how to successfully use it. After completion of the training you can do the exam to obtain the Porfessional Scrum Master certificate, issued by Scrum.org.

Scrum is the most successful and popular framework to implement agile: With its simple structure and clearly defined roles, agile principles can be learned and implemented fast. The benefits of Agility show up in a short time.

The self-organized team is in the center of Scrum. The Scrum Master helps the team to stick to the flow, to remove impediment and to continuously reflect and improve the way of working.

In this 2 day training the students learn the principles fo Agile and Scrum and its practical usage. We integrated the LEGO4Scrum simulation, in which the Scrum flow is played through end2end.
